

Meadow Flowers in Spring (2)

Marsh Marigold
Caltha palustris

Likes damp places
like this ↙ & this ↘
as name suggests

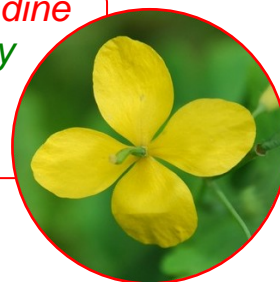

Buttercups
Ranunculus acris
are the small flowers
in the photo above

Lesser Celandine
Ranunculus ficaria

Greater Celandine
from the poppy
family is quite
different ↙

The above plants are from same family
Ranunculaceae and all are **poisonous**,
the Marsh Marigold especially. **Beware!**
